

# Sustainable Space, Sustainable Earth:

From Ideas to Action

**Friday, December 6**  
**8:30AM-4:00PM**  
Framingham State University  
McCarthy Center Forum

Concerned about Earth sustainability? Then you should care about space sustainability.

Galvanized by the prospective technological and economic advancements of space exploration? Then consider how we can maximize the effectiveness of using space for addressing global challenges.

Framingham State University invites you to a symposium on space sustainability: the secure, sustainable, and peaceful use of space for the benefit of planet Earth and all its peoples.

**Vandana Singh**  
Framingham State University  
*Physics and Science Fiction*

**David Kendall**  
Past Chair of UN COPUOS  
*Space Policy*
